

University of New Mexico Herbarium (UNM:Vascular Plants)

Catalog Number / Barcode: UNM0153940

Occurrence ID: e1e71123-a77a-49ef-8f3c-f123e07bd66c

Taxon: *Adiantum aleuticum* (Rupr.) Paris

Family: Pteridaceae

Collector: Harpo Faust

Number: 5807

Date: 2025-09-27

Verbatim Date: 9/27/25

Additional Collectors: Saff Killingsworth, Peri Lee Pipkin

Locality: United States, New Mexico, Grant, Gila National Forest, Golden Link Trail, Little Dry Creek, 400 ft SW of Golden Link Cabin, in creek. [Location ID: HF-353]

Latitude/Longitude: 33.290782 -108.714277 +-10m. WGS 84

Elevation: 2083 meters (6832ft)

Habitat: Enclosed rhyolitic boulder dominated creek drainage above and below waterfalls entirely surrounded by boulders or vertical cliff face. Large seepy cliffside below waterfall fully covered with moss with verdant forb and fern cover up until creek edge. Plant cover dominated by *Adiantum aleuticum*, *Dryopteris filix-mas*, *Aquilegia chrysantha* with occasional vegetative graminoids.

Notes: Abundant at site. First collection of species in state.
